No part of this publication may be reproduced or transmitted in any form or by any means, electronic or mechanical, including photocopy, recording, or any information storage and retrieval system, without permission in writing from the copyright owner.

The appearance of the code at the bottom of the first page of an article in this journal indicates the copyright owner's consent that copies of the article may be made for personal or internal use, or for the personal or internal use of specific clients. This consent is given on the condition, however, that the copier pay the stated per copy fee through the Copyright Clearance Center, Inc., (Operations Staff, P.O. Box 765, Schenectady, New York 12301), for copying beyond that permitted by Sections 107 or 108 of the U.S. Copyright Law. This consent does not extend to other kinds of copying, such as copying for general distribution, for advertising or promotional purposes, for creating new collective works, or for resale. Copy fees for pre-1979 articles are the same as those shown for current articles.

Contents of Volume 69

Number 1, March 1979

ll Papers

Don B. Carter and Stephen E. Harris. Chromosomal Proteins from the Embryoid Body/Teratocarcinoma System 1

Raman K. Roy, F. A. Sreter, and Satyapriya Sarkar. Changes in Tropomyosin Subunits and Myosin Light Chains during Development of Chicken and Rabbit Striated Muscles 15

Siegward Strub. Leg Regeneration in Insects. An Experimental Analysis in *Drosophila* and a New Interpretation 31

L. L. Rubin, S. M. Schuetze, and G. D. Fischbach. Accumulation of Acetylcholinesterase at Newly Formed Nerve-Muscle Synapses 46

Thomas T. Chen, Pierre Couble, Randa Abu-Hakima, and Gerard R. Wyatt. Juvenile Hormone-Controlled Vitellogenin Synthesis in *Locusta migratoria* Fat Body. Hormonal Induction *in Vivo* 59

David A. Swann, Patricia K. Donahoe, Yasuo Ito, Yasuhide Morikawa, and W. Hardy Hendren. Extraction of Mullerian Inhibiting Substance from Newborn Calf Testis 73

Donner F. Babcock, Jai Pal Singh, and Henry A. Lardy. Alteration of Membrane Permeability to Calcium Ions during Maturation of Bovine Spermatozoa 85

Paul M. Wassarman, Richard M. Schultz, and Gail E. Letourneau. Protein Synthesis during Meiotic Maturation of Mouse Oocytes *in Vitro*. Synthesis and Phosphorylation of a Protein Localized in the Germinal Vesicle 94

Robert Cafferata, Jeffrey Panosian, and Gladys Bordley. Developmental and Biochemical Studies of Adhesive Specificity among Embryonic Retinal Cells 108

A. P. Mahowald, J. H. Caulton, and W. J. Gehring. Ultrastructural Studies of Oocytes and Embryos Derived from Female Flies Carrying the *grandchildless* Mutation in *Drosophila subobscura* 118

P. A. McGrath and M. R. Bennett. The Development of Synaptic Connections between Different Segmental Motoneurones and Striated Muscles in an Axolotl Limb 133

Glenn E. Morris and Robin J. Cole. Calcium and the Control of Muscle-Specific Creatine Kinase Accumulation during Skeletal Muscle Differentiation *in Vitro* 146

Florence Moog and Kwo-yih Yeh. Pinocytosis Persists in the Ileum of Hypophysectomized Rats Unless Closure is Induced by Thyroxine or Cortisone 159

Masasuke Araki, Mitsuhiro Yanagida, and T. S. Okada. Crystallin Synthesis in Lens Differentiation in Cultures of Neural Retinal Cells of Chick Embryos 170

Pat Simpson. Parameters of Cell Competition in the Compartments of the Wing Disc of *Drosophila* 182

Thomas B. Rice, Frances A. Rice, and Alan Garen. Adult Abnormalities Resulting from a Localized Blastoderm Defect in a Maternal-Effect Mutant of *Drosophila* 194

Robert B. Devlin and Charles P. Emerson, Jr. Coordinate Accumulation of Contractile Protein mRNAs during Myoblast Differentiation 202

Gregory J. Dolecki and L. Dennis Smith. Poly(A)$^+$ RNA Metabolism during Oogenesis in *Xenopus laevis* 217

Kohji Ikenishi and Minoru Kotani. Ultraviolet Effects on Presumptive Primordial Germ Cells (pPGCs) in *Xenopus laevis* after the Cleavage Stage 237

JORMA WARTIOVAARA, ILMO LEIVO, AND ANTTI VAHERI. Expression of the Cell Surface-Associated Glycoprotein, Fibronectin, in the Early Mouse Embryo 247

BARBARA R. HOUGH-EVANS, SUSAN G. ERNST, ROY J. BRITTEN, AND ERIC H. DAVIDSON. RNA Complexity in Developing Sea Urchin Oocytes 258

MICHAEL HECKER AND KARL-HERMANN KÖHLER. Protein and Nucleic Acid Synthesis during Imbibition of Dormant and After-Ripened *Vaccaria pyramidata* Seeds 270

RICHARD I. WOODRUFF. Electrotonic Junctions in Cecropia Moth Ovaries 281

CHARLES C. LAMBERT AND DAVID EPEL. Calcium-Mediated Mitochondrial Movement in Ascidian Sperm during Fertilization 296

Review

IGOR B. DAWID AND WALTER WAHLI. Application of Recombinant DNA Technology of Questions of Developmental Biology: A Review 305

Brief Note

MICHAEL R. KLASS, NURIT WOLF, AND DAVID HIRSH. Further Characterization of a Temperature-Sensitive Transformation Mutant in *Caenorhabditis elegans* 329

NUMBER 2, APRIL 1979

Full Papers

CHARLES F. IDE, BARRY E. KOSOFSKY, AND R. KEVIN HUNT. Control of Pattern Duplication in the Retinotectal System of *Xenopus*. Suppression of Duplication by Eye-Fragment Interactions 337

RICHARD TAK-KAM LING, CHARLES F. IDE, AND R. KEVIN HUNT. Control of Pattern Duplication in the Retinotectal System of *Xenopus*. Induction of Duplication in Eye Fragments by Secondary Cuts 361

BARBARA S. CHAPMAN AND ALLAN J. TOBIN. Distribution of Developmentally Regulated Hemoglobins in Embryonic Erythroid Populations 375

LEA ZISKIND AND A. J. HARRIS. Reinnervation of Adult Muscle in Organ Culture Restores Tetrodotoxin Sensitivity in the Absence of Electrical Activity 388

DONALD P. WEEKS AND PHILIP S. COLLIS. Induction and Synthesis of Tubulin during the Cell Cycle and Life Cycle of *Chlamydomonas reinhardi* 400

ANK A. W. TEN HAVE-OPBROEK. Immunological Study of Lung Development in the Mouse Embryo. II. First Appearance of the Great Alveolar Cell, as Shown by Immunofluorescence Microscopy 408

RUBEN ADLER, MARSTON MANTHORPE, AND SILVIO VARON. Separation of Neuronal and Nonneuronal Cells in Monolayer Cultures from Chick Embryo Optic Lobe 424

PATRICIA BUCKLEY AHRENS, MICHAEL SOLURSH, REBECCA S. REITER, AND CARL T. SINGLEY. Position-Related Capacity for Differentiation of Limb Mesenchyme in Cell Culture 436

C. D. ALLIS, E. M. UNDERWOOD, J. H. CAULTON, AND A. P. MAHOWALD. Pole Cells of *Drosophila melanogaster* in Culture. Normal Metabolism, Ultrastructure, and Functional Capabilities 451

JAMES B. TURPEN, CAROL J. TURPEN, AND MARTIN FLAJNIK. Experimental Analysis of Hematopoietic Cell Development in the Liver of Larval *Rana pipiens* 466

JEFFREY K. GRIFFITH AND OLIN D. ANDERSON. Synthesis and Turnover of hdRNA and mRNA in the Salivary Gland of the Blowfly *Calliphora erythrocephala* 480

ALEXANDRA LEVITT, RICHARD AXEL, AND HOWARD CEDAR. Nick Translation of Active Genes in Intact Nuclei 496

FERNANDO DINI AND PIERANGELO LUPORINI. Preconjugant Cell Interaction and Cell Cycle in the Ciliate *Euplotes crassus*. Switching from the Vegetative to the Sexual Stage 506

THOMAS F. LINSENMAYER AND D. M. KOCHHAR. *In Vitro* Cartilage Formation: Effects of 6-Diazo-5-Oxo-L-Norleucine (DON) on Glycosaminoglycan and Collagen Synthesis 517

THOMAS A. LINKHART AND STEPHEN D. HAUSCHKA. Clonal Analysis of Vertebrate Myogenesis. VI. Acetylcholinesterase and Acetylcholine Receptor in Myogenic and Nonmyogenic Clones from Chick Embryo Leg Cells 529

JOHN PALKA, PETER A. LAWRENCE AND H. STEPHEN HART. Neural Projection Patterns from Homeotic Tissue of *Drosophila* Studied in *bithorax* Mutants and Mosaics 549

RAYMOND REEVES AND PETER CSERJESI. Constitutive Synthesis of Globins within Most of the Members of an Uninduced, Proliferating Population of Friend Erythroleukemic Cells 576

MARKKU KURKINEN, KARI ALITALO, ANTTI VAHERI, SVANTE STENMAN, AND LAURI SAXÉN. Fibronectin in the Development of Embryonic Chick Eye 589

TORU HIGASHINAKAGAWA, MARIKO SEZAKI, AND SHUNZO KONDO. Isolation of Nucleoli from *Tetrahymena pyriformis* 601

CHARLES T. THEISEN. Effects of Hydroxyurea during Final Neuronal DNA Synthesis in Dorsal Root Ganglia of Rats 612

JOHN F. MCCARTHY AND DOROTHY M. SKINNER. Changes in Ecdysteroids during Embryogenesis of the Blue Crab, *Callinectes sapidus* Rathbun 627

ROGER R. MARKWALD, TIMOTHY P. FITZHARRIS, DAVID L. BOLENDER, AND DAVID H. BERNANKE. Structural Analysis of Cell:Matrix Association during the Morphogenesis of Atrioventricular Cushion Tissue 634

ief Notes

RONALD E. ALLEN, MARVIN H. STROMER, DARREL E. GOLL, AND RICHARD M. ROBSON. Accumulation of Myosin, Actin, Tropomyosin, and α-Actinin in Cultured Muscle Cells 655

D. MÉNARD AND C. MALO. Insulin-Evoked Precocious Appearance of Intestinal Sucrase Activity in Suckling Mice 661

ELIZABETH C. THEIL AND GEORGE M. TOSKY. Red Cell Ferritin and Iron Storage during Chick Embryonic Development 666

uthor Index for Volume 69 673

The Subject Index for Volume 69 will appear in the December 1979 issue as part of a mulative index for the year 1979.

Information for Authors

Developmental Biology will publish papers on problems of development in the oadest sense. Embryonic and postembryonic development, growth, regeneration and ssue repair in plants and animals, and the analysis of these phenomena at the olecular and cellular levels are topics suitable for the journal. Papers on reproductive ology, aging, and teratology will be published only when they bear on developmental echanisms of general interest. Papers are sought that employ the techniques and ncepts of many disciplines including those of biochemistry, biophysics, cytology, perimental morphogenesis, genetics including cell genetics, immunology, neurobiol- y, physiology, and microbiology. In all areas, analytical rather than descriptive udies will be favored.

Original papers only will be considered. Submission of a manuscript implies the thors' assurance that the same work has not been and will not be published nor is esently submitted elsewhere, and that all persons listed as authors have given their proval for the submission of the paper; further, that any person cited as a source of rsonal communications has approved such citation. Explicit proof of these implied surances may be required at the Editor's discretion. Articles and any other material blished in *Developmental Biology* represent the opinions of the author(s), and should t be construed to reflect the opinions of the editor(s), the publisher, or the Society of velopmental Biology.

Authors submitting a manuscript do so on the understanding that if it is accepted for blication, copyright in the article, including the right to reproduce the article in all ms and media, shall be assigned exclusively to the Publisher. The Publisher will not use any reasonable request by the author for permission to reproduce any of his or contributions to the journal.

Articles usually do not exceed 15,000 words and must be preceded by an abstract of out 200 words that should be fully intelligible by itself. Brief notes are 2500 words or s, including the bibliography, and should have an abstract of less than 100 words. papers will be published in English.

Manuscripts should be concise. Full documentation of results in support of conclusions uld be combined with maximum brevity compatible with clarity. The discussion tion should relate the present work to previous knowledge but should not be anded into a review of the field. The standard order of sections is: abstract, roduction, materials and methods, results and discussion. Combined results and cussion may be used. In the manuscript acknowledgment, references, footnotes, les, and figure legends should follow the discussion in that order. All pages of the nuscript should be numbered consecutively and typed double-spaced throughout. thors should provide a running title of 35 letters and spaces or less. Use footnotes ringly. Cite them with superscript numbers and type them on a separate sheet. th rare exceptions do not italicize for emphasis.

n the Methods section, authors should draw attention to any particular chemical or logical hazards that may be involved in carrying out the experiments described. y relevant safety precautions should be described; if an accepted code of practice has n followed, a reference to the relevant standards should be given.

Abbreviations and units should be used consistently. Consult the lists published in *Proceedings of the National Academy of Sciences (U.S.A.)* the *Journal of Biological emistry,* and *Biochemistry* for standard abbreviations which need not be defined. lect all abbreviations into a footnote and refer to it at the first use of an abbreviation.

The use of units should follow the Système International. Use prefixes, e.g., μM, not 10^{-6} M. Note that *M* stands for molar, not mole. Use hr, min, sec, rpm, and cpm without definition, without a period, and without an "s" in the plural (i.e., 20 min).

Figures should be numbered consecutively in the order of their appearance and each should have a descriptive legend. Mark all figures with the author's name.

Line drawings should be made with India ink on smooth white paper or professional-quality drafting paper. Do not submit original line drawings larger in size than 13 x 10 in.; instead enclose smaller prints. Good quality prints are acceptable in any case. Drawings will be reduced as much as is compatible with the complexity of the figure, usually to column or page width. The lettering should be large enough to be at least 1.5 mm high after reduction.

Photographs should be the actual size for reproduction and labeled with letters 2 to 4 mm high. Figures should fit column or page width and should be at most 8 in. long. If the author decides to bleed the page (no margins), labels and figure numbers should be no closer than 3/4 in. to the margin. Figures to be bled must be 7 × 10 1/4 in. (17.8 × 26 cm) to allow trimming. When several figures appear together as one plate, mount them on cardboard or paper as close together as possible. The engraver will tool thin white lines between figures. Give magnifications in the legends or indicate them with a scale marker on the photograph. The second copy of each manuscript must include good-quality glossy prints of all photographs. Two reviewers' copies should be submitted when originals are oversized or mounted on heavy cardboard. The author will defray the expense of color plates.

Tables should be typed on separate pages and numbered consecutively with Arabic numerals, and each should have a concise heading.

References to the literature should be cited as: Doe (1965) has observed that . . . (Doe, 1955); Doe *et al.* (1960) should be used in the case of articles with more than two authors. Use suffices a, b, etc. following the date to distinguish two or more works by the same author(s) in the same year (Doe, 1960a, b). Numbered references will no longer be accepted. Arrange literature citations in the bibliography alphabetically according to the surname of the author, using the following order of items: author(s), date of publication, title of article or book, journal name, volume number, inclusive pages, publisher and city (for books only). Abbreviate titles of journals according to *Chemical Abstracts' Service Source Index*.

Page proofs rather than galleys will be sent. This speeds production. Detailed instructions will be sent with proofs. A quick response and minimal changes on proofs are imperative to maintain schedules.

Features will include announcements of meetings and courses in the field of developmental biology, and some meeting reports. Persons interested in preparing meeting reports are encouraged to contact the Editor.

To submit a manuscript, send two copies to Igor B. Dawid, Department of Embryology, Carnegie Institution of Washington, 115 West University Parkway, Baltimore, Maryland 21210, Tel. (301) 235-0460. Indicate the name, address, and telephone number of the author who should be contacted in editorial matters.
